Professional Summary

Computer Science graduate with hands-on experience in Java, Python, Spring Boot, MySQL, HTML, CSS, JavaScript, and web development. Developed multiple software and web-based projects including e-commerce platforms, tracking systems, and quiz applications. Strong foundation in OOP, DBMS, DSA, and problem-solving with excellent communication and teamwork skills. Seeking an entry-level Software Developer, Java Developer, or Backend Developer role.

Education

B.Tech in Computer Science & Engineering	Jul 2025
Bengal College of Engineering and Technology, MAKAUT	CGPA: 7.83
Higher Secondary (Science)	2020
Tribeni Thermal Dr. Bidhan Chandra Roy Vidyalaya, WBBSE	77%
Secondary Education	2018
Tribeni Thermal Dr. Bidhan Chandra Roy Vidyalaya, WBCHSE	75%

Technical Skills

Languages: Java, Python, JavaScript || **Database:** MySQL
Frontend: HTML, CSS, JavaScript || **Backend:** Spring Boot, Spring MVC, JDBC, Servlets, Hibernate
Tools: Git, VS Code, Postman, IDLE || **Concepts:** DSA, OOP, DBMS, Operating Systems, Computer Networks

Experience

Data Annotator, Jeenish BPO (Semi-technical)	Dec 2024 – Feb 2025
Annotated images and labeled datasets for ML training with focus on accuracy and consistency.	
Customer Service Executive, Tech Mahindra (Non-technical)	Jul 2025 – Dec 2025
Handled inbound/outbound customer queries, resolved billing and technical issues, maintained records, and followed escalation procedures.	

Certifications

- Bootcamp on Unmanned Aerial Systems & Related Technology, NIT Durgapur (2023)
- Java Programming Training, Aptech, Chinsurah (Sept 2025 – Feb 2026)

Projects

Website for Handmade Jewellery Brand - Chitrangada (HTML, CSS, JavaScript, Node.js) [Website] | GitHub

- Developed a full-stack handmade jewellery e-commerce website "Chitrangada" using HTML, CSS, JavaScript for the frontend and a backend using Node.js. The system handles product management, cart operations, and order processing, with data stored in a database (MySQL). It includes a structured checkout flow and API-based communication between frontend and backend for a smooth and scalable shopping experience.

Online Quiz System (Java) GitHub

- Developed a Java-based Online Quiz System using core Java (OOP concepts, ArrayList, and Scanner class) that allows users to attempt MCQ-based quizzes, calculates score and percentage, and displays instant results with a simple admin panel to add questions dynamically.

Expense Tracker (Python) GitHub

- Developed a Python-based Smart Expense Tracker using Python (file handling and control flow) and SQLite database to manage income and expenses, perform automatic balance calculation, and provide a simple menu-driven interface for adding, viewing, and deleting financial records.

Menstrual Cycle Tracker (Python) GitHub

- Developed a Python-based Menstrual Cycle Tracker using the datetime module, conditional statements, and date calculations to predict upcoming periods, ovulation dates, fertile windows, and cycle phases. The application analyzes user-entered cycle data and provides personalized health insights, wellness recommendations, and reminders. It automatically calculates important cycle events and displays phase-specific guidance to help users better understand and manage their menstrual health. This project demonstrates skills in Python programming, user input handling, logical decision-making, and real-world problem solving.

Baby Daily Routine Tracker (Java) GitHub

- Developed a Java-based Baby Daily Routine Tracker using Core Java, OOP concepts, ArrayList, and user input handling to manage and monitor a baby's daily activities. The application allows users to record feeding schedules, sleep patterns, diaper changes, growth measurements, and activity notes. It generates daily summaries and maintains routine records for easy tracking. This project demonstrates object-oriented programming, data management, and real-world application development skills.

Employee Management System (Java) GitHub

- Developed a Java-based Employee Management System using OOP concepts, ArrayList, and user input handling. The application supports CRUD operations including adding, viewing, searching, updating, and deleting employee records through a menu-driven interface. This project demonstrates object-oriented programming, data management, and problem-solving skills.

Dream Career Roadmap (HTML, CSS, JavaScript) [Live Demo] | GitHub

- Developed a career guidance web application that generates personalized learning roadmaps, required skills, salary insights, project recommendations, and interview preparation tips based on users' selected career goals. Implemented dynamic content rendering, responsive UI, and modern glassmorphism design using HTML, CSS, and JavaScript.
